

Blue Max/Quantum – Examples Of Bug Fixes

(some of the more visual ones)

Full game crash (a branch to nowhere) and a “brown screen” in combination → fixed!

The “Squadron Leader” was lost and never seen before → fixed and available!

Ships on shore leave → fixed!

Inconsistent scoring, 10,020 points = Kamikaze Trainee? → fixed!

Nice text output by aggressively pushing F3/F5 → fixed!

A lot more was fixed such as the disappearance of blue flashing targets, but they are not always so “visual”.
