

# "Walkthrough"

Well - this is not a real walkthrough yet. You have to collect all the items.

I would suggest collecting them from the top of the castle to the bottom. One item is not listed above which is the hair of the witch. You have to collect the scissors before (Thanks to Fredrik Bissmarck for the hint). Then climb up again and jump onto her to get it. When you have got all of the items get down to the cauldron and jump into it. Well it sounds easy, but everybody who has ever played the game will tell you something different.
